* VALIDO ANCHE PER TUBO CONDUTTIVO
(ALSO VALID FOR CONDUCTING TUBE)

** Please check compatibility with hose external diameter, that may change depending on the manufacturer's

** Verificare la compatibilità con il diametro esterno del tubo che potrebbe variare a seconda della casa costruttrice.

*3 Note: Controllo con tampone No-Go diametro 19.65 mm

*3 Note: Check with No-Go gauge diameter 19.65 mm

Nota: Data la larga tolleranza ammessa sulle dimensioni dei tubi, le quote di pressatura espresse sono indicative, si consiglia pertanto di utilizzare sempre i tamponi passa non passa per verificare il giusto collasso del codolo.

Note: Considering the wide tolerance admitted on the hoses dimensions, the expressed crimping diameters have to be considered as approximate; therefore, it is recommended to use always the go - no go gauge in order to check the tail collapse.

ASSEMBLY INSTRUCTIONS

Istruzioni di assemblaggio

1- Scegliere il tubo (A), le boccole (B) e gli inserti (C)

2- Tagliare il tubo alla lunghezza richiesta, usando una lama rotante di acciaio.

3- Se è richiesta la spellatura esterna, asportare più gomma della copertura possibile, fino alla "lunghezza di spellatura" specificata nella presente tabella, evitando di danneggiare i fili di acciaio del rinforzo.

4- Posizionare la boccola sul tubo.

Inserire l'inserto nel tubo.

Selezionare la "SPINA di CONTROLLO COLLASSO"

Inserire la SPINA nel foro dell'inserto.

La parte "Non Passa" deve entrare completamente nel foro dell'inserto.

Rimuovere la SPINA.

5- Pressare la boccola al diametro di pressatura specificato nella tabella.

6- Controllare il diametro di pressatura misurandolo su ogni coppia di morsetti.

Le misure vanno prese al centro della lunghezza della boccola.

Tutte le misure prese devono essere in accordo con il diametro di pressatura specificato (+0,01-0,2 mm.).

7- Inserire la "SPINA di CONTROLLO COLLASSO".

8- Se la parte "Non passa" della "SPINA di CONTROLLO COLLASSO" si blocca nel foro, il diametro di pressatura ed il collasso del foro sono corretti.

9- Se la parte "Non passa" della "SPINA di CONTROLLO COLLASSO" entra completamente nel foro, il diametro di pressatura deve essere ridotto, di decimo in decimo

10 Se la parte "Passa" della "SPINA di CONTROLLO COLLASSO" non entra nel foro, il diametro di pressatura deve essere aumentato,

1- Select the hose (A), ferrules (B) and inserts (C)

2- Cut the hose squarely using a rotary steel blade to the required length.

3- If skiving is required, remove all rubber cover to the "skiving length" specified in the table, avoiding damages to the steel wires reinforcement.

4- Place the ferrule fully onto the hose.

Push the insert fully into the hose.

Select the "COLLAPSE CONTROL MANOREL"

Insert the MANOREL into the insert bore.

The "NO GO" part of the MANOREL must fully go into the insert bore. .

Remove the MANOREL.

5-Crimp the ferrule to the diameter specified in the table

6- Inspect the crimp diameter by measuring it on each die impressions. All measurements must be taken in the center of ferrule length.

All measurements must be according to the specified crimping diameters, within a tolerance +0,01-0,2 mm.

7- Insert the "COLLAPSE CONTROL MANOREL".

8- If the "NO GO" part of the MANDREL stops in the bore the crimping diameter and the bore collapse are correct.

9- If the "NO GO" part of the MANDREL goes through the bore, the crimping diameter must be reduced by increments of 0,1 mm

10- If the "GO" part of the MANDREL does not go through the bore, the crimping diameter must be increased.

COSTRUZIONE DEL TUBO RACCORDATO

Il personale addetto alla costruzione del tubo raccordato, deve essere opportunamente preparato sull'impiego dei componenti e delle attrezzature specifiche.

Raccordature ben eseguite, sono fondamentali per la vita del tubo flessibile, mentre una raccordatura male eseguita può creare problemi di sfilamento dai raccordi, e causare un pericoloso "effetto frusta" del tubo o, peggio, creare possibili incendi od esplosioni per i vapori o le nebulizzazioni del fluido trasportato.

Controllo dei componenti

Prima della raccordatura, esaminare i componenti per:

- *Configurazione e tipologia*
- *Pulizia*
- *Danni sulla copertura*
- *Intaccature*
- *Diametri*
- *Ostruzioni all'interno dei tubi*
- *Altri difetti visibili*
- *Danni in genere*
- *Lunghezze idonee*
- *Bave di lavorazione*
- *Corrosioni*

Compatibilità dei tubi e dei raccordi

Porre molta attenzione nella valutazione della compatibilità tubo/raccordo. Non accoppiare tubo e raccordo provenienti da due produttori diversi, senza autorizzazione da parte degli stessi costruttori

Dispositivi di sicurezza

Durante la produzione del tubo raccordato, utilizzare sempre dispositivi di sicurezza personali, quali occhiali protettivi, mascherine filtranti ed adeguata ventilazione

Riutilizzo dei tubi e dei raccordi

Nella produzione del tubo raccordato, non utilizzare mai:

- a. *Raccordi pressati che si siano sfilati in esercizio*
- b. *Parti di raccordo recuperate da altri tubi raccordati*
- c. *Tubi utilizzati per altre operazioni di controllo e verifica*

Pulizia interna dei tubi raccordati

I tubi raccordati possono raccogliere parti contaminanti durante la lavorazione.

Flussare i tubi fino al raggiungimento ad un livello di pulizia ottimale.

HOSE-ASSEMBLY FABRICATION

Persons fabricating hose assemblies should be trained in the proper use of equipment and materials.

Properly assembled fittings are vital to the integrity of a hose assembly. Improperly assembled fittings can separate from the hose and may cause serious injury or property damage from whipping hose, or from fire or explosion of vapor expelled from the hose.

Component Inspection

Prior to assembly, examine components for:

- *Configuration and types*
- *Clean*
- *Damage on cover*
- *Nicks*
- *Diameters*
- *Obstruction of the tubes within*
- *More visible defects*
- *Damage in general*
- *Lengths suitable*
- *Swelling*
- *Machining burrs*
- *Corrosion*

Hose Fittings Compatibility

Pay attention to the hose – fittings compatibility.

Do not use a hose from one manufacturer with a hose fitting from another manufacturer without the consent from the same manufacturers

Safety Equipment

During fabrication, use proper safety equipment, including eye protection, respiratory protection, and adequate ventilation.

Reuse of Hose and Fittings

Do not reuse:

- a. *Field-attachable fittings that have blown or pulled off hose*
- b. *Any part of hose fittings that were permanently crimped or swaged to hose*
- c. *Hose that has been in service after system check-out*

Clean inside of the tubes connected

The tubes connected shares may collect contaminants during processing. Flush the pipes until they reach an optimum level of cleanliness.
